

Inset door handles prevent protruding parts eliminating breakages.

Wide grip top handles for light touch easy movement.

Devices sit horizontally within roomy compartments to protect the device with space for protective cases.

Cable clip channels located in the side of each device storage shelf to ensure cable is locked into position.

Silent ventilation system includes floor and rear vents to keep devices cool with constant air circulation without the need for a noisy fan that can also spread germs.

Charges all devices simultaneously. Power 7 Management System manages the power consumption to ensure power surges do not occur and all devices charge efficiently. Power 7 features a sophisticated timer allowing three different charge schedules a day, 7-days a week. Power strips turn on one at a time, 1.5 seconds apart to provide inrush surge protection.

Key locking system, tested by an independent locksmith, 6 plate lever activation system and double-sided key with two sets of teeth, making the lock more durable, impossible to pick and substantially increasing security.

Fitted with large all directional swivel, non-marking hospital grade rubber wheels (2 braked).

Each AC holder takes 2 x AC chargers adaptors to secure cables in place, organised and free from damage with ventilation to prevent overheating. AC pockets manufactured from flexible ABS to allow users to bend open the pocket allowing easy access during set-up and maintenance.

Both front and rear door fully open 270° which gives full access to both device and power compartments.

Device adaptors plug into 4 x 8-way power strips designed and manufactured in-house. Sockets accommodate larger adaptors and plugs without blocking adjacent outlets.

IEC socket with 1.8m / 6ft power cord designed to snap out if pulled away from the wall to prevent damage.
