

1. Ergonomic wide grip ABS handles for light touch easy movement.

2. Dual point locking system, with keys provided, to secure at the top and bottom of both device and power compartment to prevent theft, damage or tampering.

3. Inset coloured door handles prevent protruding parts eliminating breakages.

4. Built-in heat sensor will shut off power if a device overheats or if interior temperature reaches 32C/90F degrees to prevent risk of fire or damage to devices.

5. Devices stored horizontally on fixed shelves for compact and protective storage. Shelves are tilted back slightly to enable device to shuffle into position and remain stable during movement.

6. Cable clip portholes located on either side of each device storage shelf to ensure cable is locked into position and free from damage.

7. Simultaneously synchronise devices using MDM software such as Apple Configurator, iTunes and others, saving time when deploying apps, setting up profiles, media and content – Boost+ is transparent to the MDM software and the host computer, the host computer recognises only the mobile devices.

8. Rounded corners fitted with rubber corner bumpers and extrusions for shock absorption to prevent damage to walls and devices inside.

9. Fitted with large all directional swivel, non-marking hospital grade rubber wheels (2 braked).

10. Large L shaped doors open wide for easy access to devices and cable management compartments.

11. Concealed lever unlocks rear power compartment to enable clear access to cables and AC adaptors when required.

12. Silent ventilation system includes a uniquely designed weldmesh base to keep devices cool with constant air circulation without the need for a noisy fan that can spread germs.

13. Well placed vents allow constant air circulation.

14. IEC socket with 1.8m / 6ft power cord designed to snap out if pulled away from the wall to prevent damage.
